CSS
PSEUDO
CLASSES

Hey Everyones 👋

CSS pseudo-classes are used to add special effects to some selectors.

You do not need to use JavaScript to use those effects.

Do Like, save and Share This Post If You Found This Helpful.

NEXT ➡️

:link

Use this class to add special style to an unvisited link.

```css
a:link {
  color: #000000;
}
```

Next →

:visited

Use this class to add special style to a visited link.

```css
a:visited {
  color: #006600;
}
```

Next →

:hover

Use this class to add special style to an element when you mouse over it.

```css
a:hover {
  color: #FFCC00;
}
```

Next →

:active

Use this class to add special style to an active element.

```css
a:active {
  color: #FF00CC;
}
```

NEXT →

:focus

Use this class to add special style to an element while the element has focus.

```css
a:focus {
  color: #0000FF;
}
```

:lang

Use this class to specify a language to use in a specified element.

```css
/* Two levels of quotes for two languages*/
:lang(en) {
  quotes: '"' '"'  "'"  "'";
}
:lang(fr) {
  quotes: "<<" ">>" "<" ">";
}
```

NEXT →

:first-child

Use this class to add special style to an element that is the first child of some other element.

```css
div > p:first-child {
    text-indent: 25px;
}
```
